Sedum ROCK 'N GROW® 'Popstar' PPAF CPBRA

(Stonecrop) This low maintenance, compact Stonecrop will be the star of your late summer garden. In the summer, blue-green foliage appears on grey-purple stems with a dense, full habit, an improvement in form from the classic Sedum caudicula. In late summer to early fall, the dense mound is completely covered with creamy grey buds that burst open to cheery, salmon pink flowers. When the flowering period is finished, darker pink seed pods extend the interest of the plant further into fall. Don't miss its darker hued counterpart, 'Superstar'! This plant pairs perfectly with other fall bloomers like hardy garden mums, asters, and Black-Eyed Susans. Try a few in containers and at the front of the border.

Height: 10-12in Spread: 16-20in Zones 3-9
