

Dianthus 'Electric Red' PPAF PRETTY POPPERS™ Series

(Pinks) Dramatic, rich red flowers that grab you from a distance. Flowers are held on strong stems above blue-green leaves. We've been working hard on breeding Dianthus in the Walters Gardens, Inc. hybridizing department, and we now have a new collection of double flowering cultivars as a result. This year, we have two top-notch varieties that we're excited to introduce to you, each unique in its own right.
