

# Mangave 'Spotty Dotty' PPAF

## MAD ABOUT MANGAVE® Collection

(Mangave) This beautiful succulent is a complex cross between an Agave and a Manfreda. 'Spotty Dotty' gets its beautiful spots from its Manfreda blood, and its thick, wide leaves from its Agave parentage. Beautiful medium green leaves are covered with small, dark burgundy purple spots. Very wide leaves fold up at the margins, displaying its sienna orange marginal teeth and long terminal spines. Leaves completely overlap each other, leaving little to no gaps, creating a full looking plant that's perfect for containers. Its leaves are softly wavy, creating unique texture. This succulent maintains a relatively low profile.

Height: 10-12in Spread: 24-30in Zones 9-10
