

## Pulmonaria 'Twinkle Toes' PPAF

(Lungwort) This beautiful shade perennial will make you dance with its impressive spring flowers and unique foliage. Starting in mid-spring shortly after Hellebores are finished booming, dainty light periwinkle blue flowers cover a low, mounded habit. After the flowers fade, you can enjoy its dark green leaves that are lightly sprinkled with silver. This plant will thrive in part shade to full shade as long as you provide moisture. Pulmonaria is an underused perennial that grows well in shady gardens. It is especially attractive when planted among hostas, ferns, and brunneras. Its flowers are among the most brilliantly colored blossoms of all perennials.
